

Job Fit: The Key to Organizational Success

A PXT Select™ Webinar

We all know a lot depends on selecting the right people and nurturing them to succeed. And, while it seems easy to make the right call, why do so many companies choose the wrong people or fail to engage the right individuals to their fullest potential? Why do so many organizations tolerate low-engagement, high-turnover, and loss of productivity as a result of these poor decisions?

We believe organizations fail to select and engage the right people because they lack the right information to make talent decisions. In this webinar, we explore how PXT Select™ provides organizations with individualized data about how their people think and work so they can match candidates or incumbents with roles they're most likely to succeed in, leading to less turnover, money saved, and increased productivity in the long run.

You Will Learn:

1. What Job Fit is, how it works, and how it's measured
2. How Job Fit can optimize your talent management strategy
3. How to implement PXT Select in your organization
4. How PXT Select improved the hiring, development, and retention of employees in a real-life situation
